

Easy for Practices. Invaluable for Patients.

ZyterHome Remote Patient Monitoring

Convenient and Safe Patient Care

- Simple, intuitive, mobile solution for monitoring patients outside of the provider practice
- Improves patient engagement and participation in the monitoring, management and treatment of their condition(s)
- Increases the potential for early intervention, decreasing the likelihood of acute episodes
- Improves the overall quality of patient care and safety

Improved Provider Efficiencies

- Efficiently triage patient care based on the needs of all of your patients – both at office appointments and at home
- Monitor patient data from a provider dashboard and initiate a virtual visit with a patient, if necessary
- Gain more time to focus on patients that need closer attention
- Grow your practice

Zyter makes it easy for provider practices to improve the overall quality of patient care and expand their offerings with remote patient monitoring (RPM). By taking advantage of this latest medical technology, provider practices can increase the potential for early intervention, thereby decreasing the likelihood of a serious or life-threatening situation.

ZyterHome™ is a comprehensive RPM solution for doctors to care for patients who can benefit from participating in their own care by actively managing, monitoring, and tracking patient health conditions remotely. Integrated with the Zyter Digital Healthcare platform, ZyterHome consists of patient-facing, pre-configured 4G-enabled devices to seamlessly track and transmit a patient's physiological data. No pairing or configuration is required by the patient, making it easy and convenient for anyone to use.

Get Practice and Patient Support with ZyterHome Assist

ZyterHome Assist is an optional, complimentary service that is included with every ZyterHome implementation. It covers everything a provider practice needs to enroll patients, as well as personalized patient support to make remote patient monitoring a seamless, successful experience. Best of all, ZyterHome Assist enables clinical staff to keep their focus on providing quality patient care. There is no additional charge for ZyterHome Assist, but provider practices must opt in to use it. Opting in gives Zyter permission to contact practice patients who have been selected to enroll in ZyterHome.

52% of consumers indicated they would use a connected health device if it was recommended by a physician.¹

Remote Patient Monitoring and Medicare

Provider practices using ZyterHome may be reimbursed for remote patient monitoring services by Medicare using CPT Codes 99453, 99454, 99457 and 99458.

Service	Reimbursement Rate
Patient Onboarding 99453 Icon: Person with three boxes	\$23.74 one time reimbursement for each enrolled patient*
Supplied Medical Device(s), Daily Recordings or Alert Transmission 99454 Icon: Medical device with stethoscope	\$78.08 per patient per month (PPPM)*
Clinical Time 99457 Icon: Stethoscope	\$59.17 PPPM*
Clinical Time 99458 Icon: Stethoscope	\$47.10 PPPM*

*2021 reimbursement rates are for the Washington, D.C., Maryland and Virginia area. Rates vary nationally by location.

Visit the [CMS website](#) to learn more about potential Medicare reimbursement using ZyterHome.

How ZyterHome Works

The pre-configured ZyterHome medical device is shipped to the patient's home after the patient signs an electronic or written consent form. Outfitted with a simple on/off button, ZyterHome medical devices are easy to use for patients of all ages, and no technical knowledge is required. Because the devices are 4G-enabled, there is no need to connect them to Wi-Fi. All the patient has to do is turn on the ZyterHome device and follow the simple instructions in the user guide. Patient data captured from each device is transmitted to the provider's ZyterHome dashboard for review and tracking.

Managing care plans for patients becomes more time efficient, since providers can quickly access and review all home monitoring device data on the ZyterHome dashboard.

Patient Data in an Intuitive, Comprehensive Dashboard

The ZyterHome provider dashboard helps physicians manage patient care plans more efficiently with quick access and review of all home monitoring device data. Plus, physicians receive notification of alerts of abnormal patient data values so they can intervene quickly. If a physician thinks it is necessary to speak with a patient to discuss their health, they can initiate a virtual office video call through the dashboard. The ZyterHome dashboard also tracks the time physicians spend analyzing RPM data.

Ideal for the Provider Practice

- Easy to use and requires no technical knowledge
- Leverages medical devices for self-care and advanced monitoring
- HIPAA-compliant
- Reduces variations in care, increasing quality and alignment with best practice
- Online enrollment with e-signature for individuals or groups
- Optional bulk enrollment provided by Zyter to individual practices for their patients

Extend Your Practice to the Home with ZyterHome

Whether patients need continuous monitoring to bring the hospital to the home or proactive monitoring to support patients post-discharge, ZyterHome offers comprehensive, integrated and easy-to-use devices that enable patients to participate in their own care and manage their conditions at home with the help of their physicians.
